LED Turn Signal Conversion Kits

Plug-n-go LED turn signal conversion kits for metric cruisers – LED lighting looks cool and gives your bike a unique custom appearance. Our LED turn signal conversion kits are incredibly bright, use very little power, produce little heat, are impact resistant and are water resistant. The convenient plug-n-go connectors allow you to install the kits quickly and easily with no cutting or splicing. Increase your visibility to motorists by lighting up faster and being seen from a greater distance with LED turn signals. Available in Amber or Red with clear lenses you can match the kits to your specific requirements. To convert turn signals from incandescent lights to LED's, a dual load or quad-load equalizer such as our 13-304A or 13-314 is required.

LED Conversion Kit Application Chart
