# NEW PRODUCT RELEASE

## Hopnel™ the Original Motorcycle Rain Gator

**Rice Lake, WI** – Hopnel™ Rain Gators were developed for riders, by riders who needed a little something to protect their feet and lower legs without requiring the donning of a full rain suit. First developed in the early 90's, Hopnel™ has led the charge by continually updating its market leading Rain Gators. If you were to compare the features of Rain Gators against the competition it becomes clear that Hopnel™ designed a product around actual use and values designing products made to be used. The Hopnel™ Rain Gators were designed extra-long to provide over the knee protection with mid-height elastic around the calf to prevent billowing at highway speeds. Made from water resistant nylon, Hopnel™ Rain Gators come equipped with heat shields in all the right places to protect your ankle and shin areas, allowing you to wrap tight to the bike without worry. Hopnel™ Rain Gators even have non-slip wear resistant boot pads allowing you to walk around with them on without wearing out the bottoms. The non-slip toe shift pad allows for continual shifting without slipping or wearing, making your ride safer. Adjustable full length hook and loop with a wide contact area provides a one size fits all leg design. Comes with a convenient storage pouch for storing your Hopnel™ Rain Gators, which also sport a left-side pocket to insure you have a place to store your pouch while you ride. Hopnel™ Rain Gators are easy to wear, easy to transport and ideal when a full rain suit is not necessary or available.

**Hopnel™ Rain Gators**
