NEW PRODUCT RELEASE

New Enhanced TireGard™ TPMS Systems

Rice Lake, WI - TireGard™ by Big Bike Parts®, the market leader in Wireless Tire Pressure Monitoring Systems introduces its next generation of WTPMS with new improved sensors. These 1/3 of an ounce sensors replace the screw on stem cap, requiring no tire re-balancing. A patented anti-theft lock prevents the sensors from being accidentally lost. These enhanced sensors offer faster and better transmitting time on pressure and temperature changes, while providing continuous transmitting when in motion.

The unique G-Force sensing recognizes movement allowing the sensors to save battery power when parked and come alive once moved. Easy to install in less than 3 minutes and is truly 100% wireless with no wiring to connect for the monitor. These new enhanced TPMS now include a soft silicon monitor skin for added protection. Now available in 2 Wheel, 3 Wheel and 4 Wheel versions.

TireGard™ Wireless Tire Pressure Monitoring Systems
